

# Strip to The Edge—Without Chemicals

## Hawk Raptor Oscillating Square Stripper / Buffer

Works into corners and along edges — no doodlebugs and handscraping needed

Chemical-free dry strip process removes several layers of finish without water or chemicals —

- Just vacuum to clean up
- Reduces slip & fall accidents
- Stops floor stripper runoff
- No odor, no chemicals — greener than traditional stripping

Up to 2X faster than traditional round machines — preps 1600 square feet or more per hour for finishing

Raptor 2014

**Dry, chemical free process** uses 3M or ETC maroon Surface Preparation Pads to easily remove old finish from tile floors in preparation for recoating. **AWESOME ON TERRAZZO** Does not remove the finish below the surface, saves labor and material costs and gives a deeper, smoother final finish.

**Also Use For**  
**Wet Stripping,**  
**Scrubbing and Buffing**  
**on Most Floor Types**  
**Great For Gym Floor Prep!**
