

Microfiber Special

Why Microfiber? - Microfiber Gives You A Cleaner Clean

- Highly absorbent, holds up to six times it's weight in water and soil.
- Excellent soil removal because dirt is attracted to the static charge of microfiber.
- Fibers reach into the pores of surfaces and remove dirt that standard mops and rags can't reach.
- Naturally antimicrobial
- Using multiple cloths helps prevent cross contamination

Professional Quality Microfiber Cleaning Cloths

- Use wet or dry
- Double stitched edges withstand repeated washing
- 16" x 16"
- 24 / case
- Available in red, green yellow or blue

\$ 1.59
each

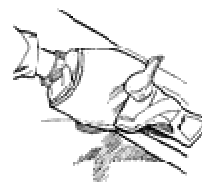

- 10 sides to trap dirt and increase efficiency - one mitt cleans an entire area
- When soiled, simply flip to the next clean face
- Washable and reusable
- Safe for all surfaces
- Available in red and green

\$ 3.49
each

Grip-n-Flip™

1. Clean or dust any surface.

2. When mitt is soiled, rotate to the other side.

3. When both sides are soiled, flip to new clean layer.

4. Now you're ready to clean again!
