

Repair Winter Floor Damage

This is hands down the best method we've found to scrub and recoat — it saves stripping even the dulllest floors. As long as floors are not discolored, you'll save tons of time and money with three easy steps:

Step One — Wet scrub floor with Redwood Floor Prep Pads

Step Two — Rinse with a Microfiber Wet Mop and Triple S Strobe

Step Three — Apply two to three coats of your favorite floor finish with the Level Best II Finish Mop

Step Four — (optional) Stand back, admire, find someone to brag to

Gary Swears By This System !

Redwood Floor Prep Pads

- Fine abrasive action removes old floor finish from tile floors without chemicals
- Improves adhesion and levels surface for next coat
- Use with 175-300 RPM machines
- Redwood pad is three-eighths inch thick, use with a one inch red pad to drive it.
- 10 pads / case

INTRODUCTORY SPECIAL

13" \$3.50 each 20" \$ 6.95 each

Microfiber Loop-End Wet Mop

- Lint-free - ideal for rinsing before applying finish
- Microfiber blend picks up the smallest dirt particles for deeper cleaning
- Can be laundered dozens of times

Level Best II Finish Mop

- Applies finish smoother with less effort
- No streaks and no lint
- Continuous filament nylon yarn
- Looped ends with tail band
